of the three cards the higher the rank of the full house. Example, K. K., K., Q. Q. F. Flush: Five cards of the same suit that are not in sequence. The highest ranked card of the flush is used to determine the rank of the flush; in case of a tie for the highest card, ranking is based on the second highest card in the hand, and so on. Example, Q. 9, 8, 6, 3 all of one suit. This hand would beat the J. 10, 8, 6, 5 all of one suit. G. Straight: Five cards in sequence, not all of the same suit. The highest card within the straight determines the rank of the straight. A 9-high straight would beat an 8-high straight. Example: J. 10, 3, 7, 11, 2, 5, of a Kingda, k.a. Trips. Three cards of the same task and the same matching cards. To Table of the

A big part of poker's appeal is that, at its essence, the rules are same everywhere. For the most part, you play with a deck of fifty-two cards, four suits, and thirteen ranks. The best five card hand takes the money. There are only five combinations of actions: check, bet, call, raise, and fold. The purpose of this book is to provide a uniform set of rules for the most popular poker games spread in public cardrooms. Some rules apply to all games. Some apply to particular games. In deciding upon which rules to use, the rulebooks of nearly every major cardroom in the country have been consulted. Where rules differ, the authors have given preference to the rule that best serves the interest of fairness in the game. While some players and cardroom managers may not agree with all the rules included, it is hoped that the comprehensiveness of Cooke's Rules of Real Poker will result in it being used as a standard in cardrooms across the country.
