They'll amaze, baffle, and challenge you! These puzzles aren't for the faint of heart, or the wimp who wants it easy. And there are hundreds of these devious dilemmas to drive your mind to its limits. Some use numbers, others logic, and still more are word games. And, each comes with an amusing drawing, too. Ready to have your brain teased? Then try this:- Arrange 15 matchsticks on the table so they form 8 complete squares, all the same size. No matches may be overlapped or broken, and no square may be formed inside another. It's high noon in Dodge City and two gunslingers are ready to draw. Here's the highfalutin' language they use: "Draw, O Coward!" "Live not on evil." Can you figure out what's strange about those lines? If you guessed they're palindromes (phrases that spell the same thing forwards and backwards), you're the winner!
