isbn: 9781845333072

This is a practical book divided into thematic chapters. The first chapter looks at the basic garden plan and how space can be used in different shaped or sized gardens. The following chapters look at ways of enlivening, or disguising unpleasant aspects of a garden's perimeter; how to make the most of both light and shade; the best ground surface substitutes for grass and paving; and ideas taken from stage designs to create theatrical effects in a garden, as well as how to rearrange space for a garden party.
