For undergraduate courses in Arboriculture; Landscape Horticulture, Landscape Architecture, Landscape Management, or Landscape Construction; Park Management, Parks and Grounds Maintenance, Park & Recreation Administration, Nursery

Management; and Urban Forestry. Regarded by many as an irreplaceable reference tool, this text describes the integration of the landscape environment (climate, soil, and related organisms), its effect on landscape plants, and how to manage both in order to obtain the desired results with reasonable effort. A comprehensive, analytic, and logically organized guide, Arboriculture is based on sound arboricultural experience and the latest applied research.
