Garden Butterflies of North America is a vivid color portfolio of 40 of North America's most treasured and colorful garden butterfly varieties. It's loaded with natural history and illustrated information on how to design and manage gardens and backyards to attract butterflies. Included are plans for all types of gardens, from a container garden to a full-sized formal garden, plantings that attract butterflies, how to build a butterfly

hibernating box, and more. Rick Mikula is the founder (in 1980) of the Hole-in-Hand Butterfly Farm. Nature Book Society Main Selection
