Growing plants from seeds is both enthralling and satisfying. Most of our garden and house plants can be raised successfully from seed, either by collecting it ourselves, or by purchasing packets from garden centres. This practical book is for gardeners of all

levels of ability who are keen to try their hand at sowing and growing their own plants. The book covers: - The biology of seeds and how they work. - Sowing and germinating seeds. - Care of seeds and seedlings. - Raising the following plants from seed: annuals, perennials, trees, shrubs, climbers, bulbs, houseplants and vegetables. \* Practical guide for beginners who can gain horticultural confidence with the easier plants, and for experienced gardeners who can experiment with a wider range of plants. \* Top authors: have had years of experience running a specialist plant nursery in Suffolk. They have written three other books for GMC: Sink & Container Gardening, Gardening With Hebes and Gardening With Alpines.
