

# Some Like It Hot

## Some Like It Hot\_下载链接1

著者:Gartin, Pamela

出版者:Gibbs Smith

出版时间:2004-10

装帧:Pap

isbn:9780941711746

Southern gardeners will welcome this informative guide to selecting landscape plants that not only survive but also thrive in the humid summer conditions found in the southern and coastal regions of the United States. The down-to-earth advice takes the

guesswork out of what plants will work where and provides imaginative techniques for both the traditional and more ecologically oriented gardener. Plant materials and their characteristics are discussed in relation to their heat zones, and readers can refer to the included American Horticultural Society Heat Zone map.
