出版时间:2006-8

装帧:HRD

isbn:9780881927887

These so-called 'jewels of Africa' with their sparkling flowers, distinctive growth habit

and floriferous nature are much prized and this account, the first to include the angraecoid orchids of both Africa and Madagascar, is long awaited. It brings together, in a single volume, descriptions of all 690 species in this intriguing group of orchids and will be the essential reference for all angraecoid orchid enthusiasts for years to come. Stewart, Herman and Campbell have all spent time in various parts of eastern and southern Africa and precise ecological information relating to habitat, altitude preferences and flowering season of individual plants will be particularly helpful to growers. The diagnostic features of each genus are illustrated and over half the species are accompanied by exquisite photographs taken in both wild habitats and in cultivation.
