The Great Vegetable Plot is Sarah Raven's guide to growing vegetables for all keen

cooks and any level of gardener. In it, she demonstrates how to plan and plant your plot, recommends the best vegetables to grow and eat and gives clear instructions on how to cultivate them using minimum input to get maximum reward. Divided into 3 sections, the book shows you what and what not to grow and the basic principles and techniques to help you achieve this. A landmark Gardeners' World book, it brings the principles of simplicity and speed to the vegetable plot, as well as including delicious food pictures to illustrate why it's worth growing your own. Illustrated with over 250 photographs by the award-winning photographer Jonathan Buckley, the book is a stylish and practical guide to vegetable gardening, and a companion volume to Sarah's previous title, Grow Your Own Cut Flowers.
