Cacti are visually exciting, bold, architectural plants. They provide form and structure to any display and create an interesting focal point. The wonderful thing about these

fascinating plants is that they thrive on neglect, requiring minimal water and tending - perfect for today's busy lifestyle. In this practical book, Shirley-Anne Bell shows how to create dramatic displays indoors as well as out, with ideas for planting schemes, landscaping effects, and container use. There is also advice on planting, maintenance and propagation, plus a plant directory to provide plenty of inspiration. This book includes: advice on keeping cacti in conservatories and other rooms in the house, choosing plants for particular setting, planning an indoor display, instructions for planting cacti outdoors and ideas for bedding displays, maintenance and propagation, and an illustrated plant directory. It is illustrated in full colour with over 150 colour photographs.
