A celebration in words and breathtaking images of thirty-five landscapes created for private clients by today's preeminent designers. This is a time of renewed originality in garden design. The last twenty years have seen a lucky confluence of money and talent lavished on gardening, and the results are surprising, enchanting, sometimes even controversial. The range of possibilities suggested by these thirty-five gardens is extraordinary: from Jacques Wirtz's undulating beech hedges that recede mysteriously into the mist to Penelope Hobhouse's latest interpretation of the traditional English garden, to Martha Schwartz's Texas creation of red, yellow, and pink painted garden rooms. These hidden masterworks of modern gardening are unlocked for us by the authority, experience, and resources of House & Garden magazine. Every page is an invitation to explore landscapes that have never before been seen by the public--and may never be seen again. International in scope and lavish in its production, this book is the last word on the state of design in the garden world. 340 color photographs.
