出版者:Random House Inc

出版时间:2005-12

装帧:HRD

isbn:9781556435850

This useful text features an extensive discussion of the history, development, and

science of Chinese medicine, and a summary of the authors’ fact-finding research trip to countries and hospitals that use Chinese herbs in the treatment of cancer. Central to the book is a substantial section of 103 colored botanical plates, constituting an atlas of the most important anticancer plants.
