

# Death By Prescription

- An adverse drug reaction is five times more likely to *kill* you than an automobile accident or AIDS
- Don't become the FDA's guinea pig ... the use of newly released drugs could be potentially life-threatening
- The use of prescription medication is the third leading cause of death in the U.S.
- Discover the *deadly* partnership formed by the U.S. Congress between the FDA and pharmaceutical companies

装帧:Paperback

isbn:9780785288282

Experienced family doctor Ray Strand writes his patients prescriptions every week, but he also believes that prescribing drugs should be a last resort in most medical cases-not a first choice. In Death by Prescription he provides simple guidelines to help readers protect themselves and their families from suffering adverse reactions to prescription medication.
