"Ayurvedic Herbs" examines clinical information available on more than 60 ayurvedic

herbs to determine how their use in traditional Indian medicine is supported by modern scientific study. Plants are grouped according to body systems and each entry includes a description, information on the source plant, distribution and traditional use, active chemical constituents, relevant pharmacology, and details of clinical tests and safety findings. This unique book also includes a brief history of Ayurveda, a history of drug development and evaluation in ancient India, and a scientific investigation of current trends.
