著者:Waltz, Mitzi

出版者:Oreilly & Associates Inc

出版时间:2001-1

装帧:Pap

isbn:9780596500030

This volume aims to help patients and families get an accurate diagnosis of partial seizure disorders, understand medications and their side effects, and learn coping skills and other adjuncts to medication. It walks readers through developmental and school issues for young children; adult issues such as employment and driving; working with an existing health plan; and getting further help through advocacy and support organizations, articles, and online resources. It also includes the stories of dozens of patients and parents.
