isbn:9780736044851

This guide contains more than 150 ready-to-use lesson plans - enough for every day of the school year. These classroom-tested lessons with developmentally appropriate

activities enable secondary school physical educators to greatly reduce their planning time. Undergraduate students in professional practice will also benefit as reduced planning time should mean they can concentrate on refining their teaching skills. The new update edition also covers assessment strategies, new units and a CD-Rom to allow the user to customise lesson plans to the needs and goals of their classes.
