In the fall of 1999, 41-year-old Meg Wolff was dying of breast cancer. She had fought the good fight; mastectomy, chemotherapy, and radiation but none of the treatments were expected to save her life. Meg had already proven that she was a fighter and that

she wanted desperately to live. Eight years earlier she was diagnosed with bone cancer and had her leg amputated. Now Meg was ready to fight again; armed with a macrobiotic diet and a determination to control how she would live or die. This is an incredible story of a courageous woman's fight to take back her life, restore her marriage, and heal herself physically and emtionally. Her story is inspiring and her message is enlightening.
