German philosopher and self-proclaimed nihilist Friedrich Wilhelm Nietzsche stands out as a furious, explosive thinker who repeatedly pulled apart the certainties of the nineteenth century and whose writings attract, astonish, and unsettle readers to this day. This volume offers a selection of Nietzsche's writings, all newly translated by the author, that facilitate an understanding and discussion of his philosophies, style, and influence. In an engaging and accessible introduction, Peter Fritzsche familiarizes students with elements key to Nietzsche's thought and his extraordinary intellectual and political influence: his condemnation of the nineteenth century as degenerate and uncreative; his rejection of Christianity, democracy, and socialism; his belief that all cultures are founded on lies and illusions; and his conviction that individuals should seek to overcome convention and morality in order to create themselves as supermen. Document headnotes give students background and guidance in reading Nietzsche's writings, and a chronology, questions for consideration, and a selected bibliography provide additional pedagogical support.

Outstanding introduction. Gave me a more holistic view of Nietzsche's philosophy.
