Destiny, restlessness, and greed moved the white man west, into lands occupied for centuries by a proud and noble people: Arapahoe, Navajo, Apache, Sioux . The bitter misunderstandings and brutal clashes of cultures that resulted ultimately shaped the nation we know today. In seven classic western tales, the New York Times -bestselling Grand Master re-creates a world of violence, deception, vengeance, and strange beauty with the same peerless storytelling power that distinguishes his acclaimed suspense fiction.
