THE PREDATORS  
Frontiersmen living in the untamed Rockies are surrounded every day by endless dangers, including attack by hostile Indians. But to Nate King and his family, the local tribes are simply people like them, people trying to live free in the glorious

mountains, and many of them have become their friends. It is only when Nate's son, Zach, sets out with his fiancée to visit her relatives in St. Louis that Zach meets savages of a very different kind -- vicious white cutthroats who kidnap his beloved. Zach is far from home, with much to learn if he hopes to save the woman he loves. But he knows one thing -- he'll save her if it's the last thing he does. Then he'll give those savages a dose of civilizing ... frontier style.
