The varied tastes of the Victorians extended to their gardens and landscapes, and Victorian Gardens describes the wide range of garden designs and planting styles that were created during Victoria's reign. The Victorians' inventiveness and enthusiasm for technology and industrial developments transformed professional British gardening

into a sophisticated and skilled profession. Public parks, carpet bedding, kitchen gardens and glasshouse displays are only a few of the era's innovative horticultural contributions that are still enjoyed today. Many of today's gardeners are rediscovering the vibrant planting schemes popular over a century ago and we can learn much from the detailed plant lists and gardening instructions that are recorded in Victorian books and magazines.
