Quest for Identity, published in 2005, is a survey of the American experience from the close of World War II, through the Cold War and 9/11, to the present. It helps students understand postwar American history through a seamless narrative punctuated with accessible analyses. Randall Woods addresses and explains the major themes that punctuate the period: the Cold War, the Civil Rights and Women's Rights movements, and other great changes that led to major realignments of American life. While political history is emphasized, Woods also discusses in equal measure cultural matters and socio-economic problems. Dramatic new patterns of immigration and migration characterized the period as much as the counterculture, the growth of television and the Internet, the interstate highway system, rock and roll, and the exploration of space. The pageantry, drama, irony, poignancy and humor of the American journey since World War II are all here.
