Meticulously researched, this book examines US dollar hegemony and the unsustainable macroeconomics of 'petrodollar recycling', pointing out that issues underlying the Iraq war also apply to geostrategic tensions between the US and other countries including the member states of the EU, Iran, Venezuela and Russia. The author warns that without changing course, the American Experiments will end the way all empires end -- with military over-tension and subsequent economic decline. He recommends the multilateral pursuit of both energy and monetary reforms within a United Nations framework to create a more balanced global energy and monetary system -- thereby reducing the possibility of future oil and oil-currency related warfare.
