装帧:Mass Market Paperback

isbn:9780312996086

This account of one reporter's month with the 82nd Airborne Division is both a conservative polemic and a vivid portrait of American infantrymen in action. Zinsmeister, who was embedded with the army as a correspondent for *The National Review*, makes no bones about his unabashed support for the war, and for the American military in general. (He tells readers that he's always taught his own children "to think of military jet noise as 'the sound of freedom.'") The prospect of spending time rubbing shoulders with soldiers in the trenches clearly delights him even before he touches down on Iraqi soil. There is humor in the Zinsmeister's account of bartering for gear in Kuwait's "Body Armor Bazaar," and he provides useful insights into how many of the non-combat operations are actually performed by private civilian contractors. One of the best moments in the book movingly recounts how an Iraqi doctor worked with American soldiers to try to save a wounded boy, yet still refused to tell Zinsmeister his name for fear that his cooperation would draw reprisals later on. The author also gives heartening evidence of the genuine care taken by the troops to avoid civilian casualties. (Less agreeable is his evidence that guerrilla warfare was in full cry even before the formal end of the war.) But readers interested in this information should be prepared to wade through pages and pages of splenetic rants against the anti-war movement and Zinsmeister's fellow journalists, whom he dubs "left-wing, cynical, wiseguy Ivy League types." Such flaws, unfortunately, are not entirely redeemed by the book's outstanding array of color photographs.
