The central plains of North America to the east of the Rocky Mountains were home to the Plains Indians; here the hunting grounds of the twelve "typical" tribes coincided

with the grazing range of the largest of the buffalo herds. The adoption of a horse culture heralded the golden age of the Plains Indians - an age abruptly ended by the intervention of the white man, who forced them into reservations in the second half of the 19th century. Jason Hook's fascinating text explores the culture of American Plains Indians, from camp life to conquest, in a volume complemented by photographs and stunning artwork.
