评论

Conan提出的研究方法是亮点： (1) select a corpus of artistic expressions of garden receptions, paying attention to all the aspects of the artworks selected that touch upon gardens; (2) pursue a study of the horizon of perception of gardens in this corpus, using, as much as possible, a critical reception approach; (3) return to a study of the artistic function fulfilled by the corpus within the works from which it was selected in order to outline the role of garden experiences in cultural development.
