During the past decade, the role of Germany's economic elites under Hitler has once again moved into the limelight of historical research and public debate. This volume brings together a group of internationally renowned scholars who have been at the forefront of recent research. Their articles provide an up-to-date synthesis, which is as comprehensive as it is insightful, of current knowledge in this field. The result is a volume that offers students and interested readers a brief but focused introduction to the role of German businesses and industries in the crimes of Hitler's Third Reich. Not only does this book treat the subject in an accessible manner; it also emerges as particularly relevant in light of current controversies over the nature of business-state relations, corporate social responsibility, and globalization.
