Why did modern states and economies develop first in the peripheral and late-coming culture of Europe? This historical puzzle looms behind every study of industrialization and economic development. In this analytical and comparative work Eric Jones sees the economic condition forming where natural environments and political systems meet: Europe's economic rise is explained as a favoured interaction between them, contrasting with the frustrating pattern of their interplay in the Ottoman empire, India and China. For the third edition Professor Jones has added a new Preface and Afterword.

作者介绍:

Reviews

'The European Miracle is a powerfully argued explanation of why the western periphery of Eurasia advanced, while the other three empires remained static, or regressed. Professor Jones's approach is sophisticated and complex. He suggests that only a concatenation of factors can explain Europe's increasing advantage.'

The Economist

'It is one of the merits of this thoughtful and stimulating book that it will awaken insights even broader and more numerous than those presented in this pithy, concentrated work.'

Journal of Historical Geography

目录: Table of Contents

Part I. Eurasia: 1. Environmental and social conjectures

2. Disasters and capital accumulation

Part II. Europe: 3. Technological drift

4. The discoveries and ghost acreage

5. The market economy
