isbn:9780440507864

The New York Times bestselling author of America's Dumbest Criminals takes on the Feds on this unofficial guide to the hilarious screw-ups the government doesn't want anyone to know about: i.e. a federal computer once listed everyone in Hartford, Connecticut, as dead and 80,000 buttons promoting safety were recalled because they were small enough to be swallowed, the pin was too sharp, and the paint was toxic. 20

line drawings.
