A hungry student is a bad student, which is why we've put together a cookbook perfect for anyone in school. Most cookbooks out there are written by adults: old people without a clue about what students can afford or what they like to eat. Not this book.

It's written by and for students and contains everything you could possibly wish for in a cookbook. Besides all the obvious stuff like cheap, tasty, nutritious and easy-to-make recipes for food, drinks and snacks, it also contains weird facts about food, food history, movie quotes and general facts. This is the student cookbook of student cookbooks.

Great-tasting food with a pop culture flavour!
