isbn:9780764323515

A photographer's artistic fascination with mannequins is explored through a series of 390 portraits from around the world. This compelling photographic essay captures the personalities and drama of storefront figures, while presenting intriguing questions

about the nature of mannequins: their relationship to art and the role they play in shaping women's form in perception and fantasy. Retailers, merchandisers, members of the fashion industry, and photography enthusiasts will all find this book a valuable source of inspiration.
