Featuring 15 of the industry's top photographers, among them Monte Zucker, Michael Ayers, Dave Newman, and Kathleen Hawkins, this guide teaches professional photographers how to capture the most flattering views of the female form--and

appeal to their largely female clientele--through careful lighting and posing. This reference emphasizes how from the very start of the process, certain techniques should be employed to create high quality images, such as using light to enhance a beautiful face and employing shadow and light to downplay any of the subject's perceived flaws or insecurities. With 36 detailed lighting and posing diagrams illustrating how to re-create the work of the pros, this handbook reveals numerous ways to create a technically flawless, saleable portrait of a female client.
