This work contains spectacular landscape images of the mountain regions of southern Appalachia. The book covers, through the medium of photography, an expansive area from the Great Smoky Mountains National Park of Tennessee - North Carolina running north along the Allegheny and Blue Ridge Mountain ranges to the Dolly Sods area of West Virginia and Shenandoah National Park of Virginia. Native Southern Appalachian photographer Jerry Greer invites you on a visual journey of the world's oldest mountains where he was born. Explore areas of the Southern Appalachians where strapping on a backpack and a pair of hiking boots are the only means of travel and enjoy a new visual perspective of America's sacred and beloved Southern Appalachians.
