From skyscrapers to parking structures, from the Stock Exchange to the historic townhouses of Harlem, the buildings of New York are as diverse as its culture. The City estimates that there are 90,000 buildings within the five boroughs, ranging from single-story warehouses to mighty skyscrapers. Now, for the first time, 1,000 of these buildings, widely varied in style—from landmarks to architectural oddities to humble utilitarian structures—are artfully photographed and beautifully celebrated.

Photographer Jorg Brockmann has captured the power and personal essence of each building, providing a fresh, close-up view of New York unlike any other. Essential information about each building, along with neighborhood maps and useful sidebars, make this the last word on New York structures large and small. It's a feast for lovers of architecture and of great photography, as well as devotees of the most vibrant and resilient city in the world.
