The Atlantic, the Red Sea, the Caribbean, the South Pacific-here are all the oceans in all colors and aspects: clear, tropical waters; turbulent open seas; immense plains of water seen from space; magical icy polar oceans; and delicate and frothy photographs from inside powerful waves. The Sea's camera eye emerges from underwater-from the multicolored coral reefs and underwater wrecks and washes on to sandy beaches, coral reefs, cliffs, and volcanic islands to observe the life of coastal villages, ports, and on ships at sea. Another chapter deals with sea creatures: predators and prey, the brightly hued, the powerful, and the delicate life of our oceans.
