装帧:HRD

isbn:9780821262054

The Dutch had Tulip Mania in the 17th century. Victorian England had its own equivalent with 'orchidelirium', an obsessive passion for orchids that has carried into the present day. Orchids remain among the most exquisite, expensive, hotly debated and passionately collected of all flowers, as Susan Orlean chronicled brilliantly in her book *The Orchid Thief*, reinterpreted as the hit film *Adaptation*. A gift book for both

serious collectors and neophytes, flower lovers and photography fanatics, Orchidelirium presents Harold Feinstein's breathtaking pictures of orchids - dozens of different varieties and shades of them. In the tradition of the critically acclaimed and highly successful gift book One Hundred Flowers, this new volume offers images of staggering detail and subtlety. Nobody has been able to match Feinstein's mastery of flower photography, and nowhere is his remarkable talent as evident as it is in these pictures of orchids, nature's most delicate and variegated creations.
