This time honoured classic has been re-built completely: after six editions the editor has decided that a radical revision is necessary. The new edition has been developed

as a result of intensive consultation with trainees in OB/GYN as to what they want, what they need and how they learn. The book is organised into two halves covering obstetrics and gynaecology. Within each, the chapters are structured into sections containing pedagogic features such as boxes, highlights and key points for the first time. It contains everything the clinician needs to practice the art of obstetrics and gynaecology and sufficient information to help sub-specialists develop their specific interests. This text is recommended reading for the Royal College of Obstetrics and Gynaecology membership examination. This seventh edition contains 21 new chapters:

Anatomy of the Pelvis and Reproductive Tract

Placenta and Fetal Membranes

Antenatal Care

Anaesthesia and Analgesia

Recurrent Miscarriage

Ectopic Pregnancy

Trophoblastic Disease

Genetics and Prenatal Diagnosis

Drugs and Pregnancy

Obstetric Emergencies

Prolonged Pregnancy

Renal Disease

Termination of Pregnancy

Imaging in Gynaecology

PMS

Assisted Reproduction

Hysteroscopy and Laparoscopy

Sexual Dysfunction

Psychological Aspects of Pregnancy

Domestic Violence and Sexual Assault - now on MRCOG curriculum

Ethical Dilemmas This seventh edition has been significantly updated with a wide range of internationally renowned contributors who are all experts in their field, bringing this book to the cutting edge of knowledge in obstetrics and gynaecology. "It was my favourite textbook when I was working for my examinations and I am still using

it. I can recommend this edition to current trainees wholeheartedly. It is certainly worth buying." Journal of Obstetrics and Gynaecology
