The information in this bestselling pocketbook will be invaluable in helping the student and junior doctor move from a presenting problem to formulating a diagnosis. The book covers 100 common presenting problems, which occur in both medicine and surgery. Each problem is dealt with in a standard manner: a brief definition of the problem, a reference table of possible diagnoses ordered by body system, a step-by-step guide to the history and examination of the patient with a view to making a final positive diagnosis a list of general instructions, which could be carried out, followed by appropriate specific investigations.
