出版时间:2005-3

装帧:HRD

isbn:9780323011983

Based on Dr. Rapini's popular Atlas of Dermatopathology, this practical resource delivers expert guidance on the evaluation and diagnosis of skin biopsies. It lists the

important clinical and histological features and variations for common and unusual diseases, highlights their most characteristic features, and provides list of differential diagnosis for clinical and pathologic changes. A user-friendly format—combined with a wealth of full-color illustrations and extensive cross referencing—make this the ideal bench side companion for quick reference and more accurate diagnoses. And, a bonus CD-ROM provides all of the book's images for use in PowerPoint®. * Presents over 700 full-color illustrations—with leader lines pointing out key pathologic findings—that depict a wide range of conditions. * Provides differential diagnosis lists of clinical and pathologic findings. Clinical lists are based on location, symptoms, duration, arrangement, morphology, and color. Pathologic lists include major categories such as epidermal changes, dermal changes, and cell types. * Features extensive cross-referencing of differential diagnosis lists by finding and disease, enabling readers to locate information quickly. * Includes a bonus CD-ROM featuring all of the book's images for use in PowerPoint®.
