isbn:9780721687568

This "one-stop" resource presents all of the information needed to identify and treat orbital fractures. A multidisciplinary team of specialists covers everything from normal orbital anatomy...through patient evaluation and diagnostic imaging...to the latest reconstructive materials and techniques for any type of orbital trauma. The result is an outstanding source of complete, balanced, and authoritative guidance to help readers achieve the best outcomes. * Presents uncommonly well-rounded coverage from an impressive roster of leading ophthalmologists • otorhinolaryngologists • oral and maxillofacial surgeons • neurosurgeons • plastic surgeons • and radiologists. * Delivers step-by-step guidelines on today's full range of bone and cartilage graft harvesting, grafting, and fixation techniques • alloplastic plating approaches • and surgical procedures, as well as management of soft tissue injuries. * Addresses ophthalmic and facial complications and discusses how to avoid them.
