出版者:Elsevier Science Health Science div

出版时间:2006-8

装帧:HRD

isbn:9780323028707

The 4th edition of this textbook presents both general pathology and special pathology in one comprehensive resource. Coverage includes a brief review of basic principles related to anatomy, structure and function, followed by congenital and functional abnormalities and discussions of viral, bacterial, and parasitic infections and neoplasia. \* Logically organized chapters discuss normal functions of the body system, followed by pathologic conditions found in domestic and companion animals.

\* While focusing primarily on diseases in North America, the text also includes pathologic conditions found in other parts of the world, as well as those being brought into this country, such as West Nile virus, through the importation of cattle, sheep, and other animals. \* Contributors are recognized in their area of expertise and are well known in research and education.
