著者:Cruse, J. M./ Lewis, Robert

出版者:Academic Pr

出版时间:2004-8

装帧:HRD

isbn:9780121983826

The "Immunology Guidebook" provides an easily accessible text-reference to the more up-to-date and difficult concepts in the complex science of immunology. It aims to

demystify basic concepts and specialised molecular and cellular interactions. Its 18 chapters offer a logical and sequential presentation where much of the data is displayed in carefully designed tables. This book is intended for immunology students, researchers, practitioners and basic biomedical scientists. Tables provide a quick reference to difficult to find immunology data. It serves as a distillate of the latest information on immunogenetics of the human MHC associated with tissue transplantation. Information boxes feature related web resources.
