"Ever since the first EMT book was written, there have been two philosophies chosen by the authors for the reader: One type is to provide for the minimal required information and to meet only the minimum standards required by the profession. At the other end of the spectrum is the philosophy that is written to be all-inclusive. This

will give the student reader (and ultimately patient care provider) the strongest knowledge possible. If you or your family were to become sick or injured in the middle of the night, in the blowing snow or in the cold rain, do you want the EMT taking care of you to be the very best they possibly could be or simply one who has taken the course to "get by"? This book is not a "get by" book. This book is not written by "get by" authors. This book is not edited by "get by" editors. Just open this book and look at the four editors - four better people in the United States to write such a book could not have been chosen." - Norman E. McSwain, Jr., MD, FACS, NREMT-P Professor of Surgery, Tulane University, The Paramedic Book Preview Site, McGraw-Hill Public Safety Website.
