isbn:9780521671606

A concise and practical reference that will help physicians become more comfortable with decision making and management of the critically ill cerebrovascular patient. Contributors from leading stroke centers cover a wide range of common conditions such as ischemic and hemorrhagic strokes, subarachnoid hemorrhage, and aneurysms, and provide focused protocols for assessing and treating patients in the emergency room, intensive care unit, or hospital floor. The book is designed for use by busy professionals who need quick answers, and chapters are packed with algorithms and summary tables providing immediate access to key information.
