isbn:9783540327035

This comprehensive atlas and textbook on strabismus surgery and its complications provides complete step-by-step instruction for the surgical management of the strabismus patient. In Part 1, detailed descriptions, photographs, and diagrams illustrate each major surgical procedure and variations. Part 2 presents an extensive

review of surgical complications including their prevention, recognition, and treatment. The text is lavishly illustrated with artwork and photographic examples, and well-supported by sample references. A CD-ROM with video-clips of surgical procedures further enhances this atlas.
