装帧:HRD

isbn:9783527316083

With three Nobel Laureates contributing to this invaluable collection of high-quality articles, carefully selected from the highly praised R.A. Meyer's Encyclopedia, these two

volumes cover a wide range of topics in protein research. Clearly divided into sections on structure, modeling, expression, analysis and others, the chapters are designed to aid readers of all levels of expertise. Each chapter includes a glossary of the most important keywords, a concise summary of the article concerned and comprehensive references for further reading. Similarly, the uniform structure of the articles makes them very easy to use, resulting in a ready reference for molecular and cell biologists, biochemists, biophysicists, and biotechnologists, as well as those working in the pharmaceutical and biotechnological industries.
