isbn:9783527310180

This is the first handbook on the whole field of stem cell research covering (1) molecular and cellular fundamentals, (2) clinical applications and (3) GMP processing. It provides a timely overview of the potential and plasticity of adult stem cells. With its focus on standardization and quality control of cell lines suited for processing and clinical trials, the book features novel therapeutic approaches that offer great promise for new ways of treating neural, hematological and cardiovascular diseases. The editors are leading international experts in adult stem cell research, and their successful networking in the US and Europe has resulted in a distinguished team of authors from around the world.
