Using a multidisciplinary approach, this all-inclusive resource provides clinicians with a strong knowledge base for understanding the complete spectrum of wound care, including the structure of the skin, its functions, types of skin damage, physiology of wound healing, and general principles of wound management. Seven new chapters cover Principles of Practice Development; Skin Care Needs of the Obese Patient; Foot

and Nail Care; Facilitating Adaptation; Support Surfaces; Devices and Technology in Wound Care; and Reimbursement and Billing. Recent advances in disease etiology, diagnosis, and treatment are discussed in appropriate chapters and each chapter opens with a list of learning objectives and closes with review questions. \* Authored and contributed by respected experts in wound care management – members of Wound, Ostomy and Continence Nurses Society (WOCN) and Wound Healing Society (WHS). \* Risk assessment scales are included to assist with determining a patient’s risk for developing a wound. \* Assessment tools are provided to assist the clinician with wound evaluation, care, and treatment. \* Patient compliance and guidance on how to identify and resolve issues of non-compliance are discussed in the new Facilitating Adaptation chapter. \* The multidisciplinary approach to wound care management is discussed in a single chapter and applied throughout the text to demonstrate how this approach works and why it is critical to successful patient outcomes. \* A wound care product formulary lists wound care products by category, usage guidelines (indications and precautions), and helpful hints is included to facilitate outcomes measurement and quality improvement.
