出版者:Elsevier Science Health Science div

出版时间:2005-10

装帧:Pap

isbn:9780323033411

Part of the popular "LPN Threads" series, "Foundations of Nursing" provides all of the fundamentals, content and skills needed to educate LPN/LVNs. Designed to be used in conjunction with "Adult Health Nursing", together these two full-colour texts provide complete coverage of all of the content needed in an LPN/LVN curriculum in a convenient multi-volume set. "Foundations of Nursing" provides coverage of fundamentals and skills, maternal and neonatal, paediatric, geriatric, mental health, and community content. "Adult Health Nursing" provides coverage of anatomy physiology and medical-surgical content. These textbooks will now be available separately, as a package, or as a single-volume combined text. Rely on these tried-and-true texts to ensure your students success both in the classroom and in practice!
