装帧: Pap

isbn:9781416028888

Concise, pocket-sized, and easy to use, this handbook provides rapid access to the drug information needed in everyday veterinary practice. The 2nd edition includes completely revised and updated information, as well as coverage of 140 new drugs. It offers specific drug data for small and large animals and is alphabetically organized by generic drug name with three additional quick-reference indexes: alphabetical by drug class, alphabetical by trade/brand name, and alphabetical by therapeutic category. A companion CD-ROM provides customizable, easy-to-understand client handout instructions and information for nearly 100 of the most commonly prescribed medications. \* All monographs are organized alphabetically and cross-referenced by classification, trade, and generic name for quick reference. \* A therapeutic index helps identify all potential drug therapies for a specific condition. \* Over 460 drug monographs are included in a new, easy access format.
